The space is divided in 3 sections , on three levels. All three levels follow a unity of color and materials, creating a modern and fashionable feel. Despite this coherent unity each section manages to enhance its own specific ambiance: the lounge is set in the basement and a strong sense of cosines is created with the black leather sofas , apparent original rock walls and pop drawings ; on the street level is the coffee shop, where the space has been sectioned like slices of salami thanks to integrated Flexiglas modules that work as tables and side illuminated walls from one end to the other of the space . These modules create the impression of a virtual passage going from the entrance in direction to the bar, obliging guests walking through to be seen and to see . On the first floor is the Restaurant area, with a more traditional and elegant feel to it.
